EDUCATION

National Chiao Tung University, Taiwan (R.O.C.)
M.S. in Computer Science & Engineering
Teaching Assistant of Computer Science Computer Center

June 2010

WORK EXPERIENCE

Huawei Technologies Co. Ltd

Senior Software Engineer

December 2015 - Present

Zhejiang, China

- Develop DSL for our wireless team, for programming L1/L2 of 4G/5G. The DSL is data-flow programming paradigm aims to help programmer focus on the in/out of each operations, and let the compiler do the code generation and optimizations. I involves in the language design, and implementing compiler (Scala) from the front-end to the back-end.

Generalplus Technology Inc.

Software Engineer

November 2013 - December 2015

Hsinchu, Taiwan

- Develop DSL for our 4-bit RISC-like processor. Instead of programming in the assembly, a DSL is implemented to help our customer reducing the time to market. The compiler is not only a standalone tool, but also integrated in our IDE to help our customer catching syntax and semantic errors in the early stage of development.
- Maintain 6502 C compiler and tool chain. The 6502 C compiler is derived from SDCC, integrated with our proprietary tool chain. My responsibilities also include helping our FAE programming the C code, and writing technical report to our customer (in English of course).

Academia Sinica

Research Assistant

October 2010 - August 2013

Taipei, Taiwan

- Research in compiler and virtualization techniques (QEMU and LLVM). Focus on binary translation and hardware performance profiling feedback optimization.

OPEN SOURCE EXPERIENCE

- Cygwin hidapi port maintainer.
- Help LLVM community releasing its first ARM binary!

TECHNICAL STRENGTHS

Computer Languages

C/C++, Scala

Tools

SVN/Git, Vim, Lex & Yacc
